

STEM CAMP for KIDS: Grades K-2

Join area educators for an action-packed STEM Camp this summer.

Participants will use the engineering design process to create a project that meets a need, solves a problem or create a product. During the three-day camp, each team of 6-8 students will work with two educators to complete their project.

STEM content and practice will be modeled and each team will use the engineering design process as a template for their work.

The 21st Century Learning Showcase will be held on the last day of the camp. During this time teams will present their project to family and friends and discuss the steps they went through in creating their design.

Where: Fort Worth Museum of Science and History

When: August 2-4, 2017, 1-4 pm
21st Century Learning Showcase -
August 4, 2017, 3-4pm

Participants should bring a nut-free snack each day.
Water will be provided.

Camp is limited to 40 students entering grades K-2.
Final details will be sent closer to the camp date.
